Volume 131 1984 UK ISSN 0143–7054

HONORARY EDITORS

Dr. D.W. Clarke (*University of Oxford*)
Prof. N. Munro (*UMIST*)

Pages in issues of *IEE Proceedings Part D*, 1984

Pages	Issue no.	Date
1–56	1	January
57–80	2	March
81–108	3	May
109–164	4	July
165–208	5	September
209–268	6	November

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to ten copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $2.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0143–7046/84 $2.00 + 0.00. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 01 240 1871.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

Z

Zeheb, E., Hertz, D., and Jury, E.I. see Hertz, D.

Book reviews

Measurement and control of liquid level. Chun H. Cho p164
Multivariable system theory and design. R.V. Patel and N. Munro p79
Robotic technology. A. Pugh p207

ADAPTIVE CONTROL

Adaptive control of discrete-time time-varying systems with unknown deterministic disturbances. X. Xianya and R.J. Evans p81
Online optimisation of the free parameters in discrete adaptive control systems. M. de la Sen p146 e228

ALGORITHMS

Algebra-geometric approach for the model reduction of large-scale multivariable systems. L.S. Shieh and Y.T. Tsay p23
Computation of balanced realisations from transfer functions. K.V. Fernando and H. Nicholson p203
Efficient algorithm for the optimal control of interconnected stochastic systems. A.K. Mahalanabis and G. Ray p99
Minimum norm state estimation for computer control of water distribution systems. M.J.H. Sterling and A. Bargiela p57
Square-root solution for the discrete-time Lyapunov equation. K.V. Fernando and H. Nicholson p107
Time-optimal control algorithm for microprocessor with asymmetrical bounds. I. Serra, L. Moreno and E. Luque p238

BIOMEDICAL ENGINEERING

Parameter estimation of system dynamics with modulation-type noise—application to the modelling of the dynamic relationship between the EMG and force transients in muscle. P.J. Lago and N.B. Jones p221

CLOSED-LOOP SYSTEMS

Computer-aided design of nonlinear controllers for torque controlled robot arms. M. Sahba and D.Q. Mayne p8

COMPUTER APPLICATIONS

Model reduction of linear multivariable control systems via frequency matching. L.R. Pujara and K.S. Rattan p243

COMPUTER-AIDED DESIGN

CAD for the design and evaluation of industrial control systems. D.J. Sandoz p125
Computer-aided design of nonlinear controllers for torque controlled robot arms. M. Sahba and D.Q. Mayne p8

CONTROL SYSTEMS

A new approach to reduced-order modelling. K. Warwick p74
CAD for the design and evaluation of industrial control systems. D.J. Sandoz p125
Functional bounds on the time response of multivariable nonlinear systems. J.O. Gray and D. Valsamis p92
Matrix sector functions and their applications to systems theory. L.S. Shieh, Y.T. Tsay and C.T. Wang p171
Minimum norm state estimation for computer control of water distribution systems. M.J.H. Sterling and A. Bargiela p57
New structure for an adaptive servomechanism controller. H.M. Silveira and R. Doraiswami p64
Note on decentralised stabilisation of unknown linear interconnected systems. J. Lyou and Z. Bien p202
Online adaptive control of a fermentation process. D. Williams, P. Yousefpour and B.H. Swanick p117
Online optimisation of the free parameters in discrete adaptive control systems. M. de la Sen p146 e228
Optimal controllers for bank-to-turn CLOS guidance. D.J. Roddy, G.W. Irwin and H. Wilson p109
Pole assignment in decentralised systems: a structural approach. F.J. Evans and M. Kruser p229
Reachability in variable structure control systems. B.A. White and P.M. Silson p85
Recursive smoothing for discrete-time systems as a filtering problem. R. Gessing p140
Robust controller design by minimisation of the variation of the coefficients of the closed-loop characteristic equation. C.S. Berger p103
Stochastic optimal control and its connection with estimation. R. Gessing p165

CONTROL THEORY

Analysis of singular systems using orthogonal functions. P.N. Paraskevopoulos p37
Design of optimal observers for structural control. M. Abdel-Rohman p158
New structure for an adaptive servomechanism controller. H.M. Silveira and R. Doraiswami p64
On the selection of states to be retained in a reduced-order model. G.J. Lastman, N.K. Sinha and P. Rózsa p15
On using orthogonal functions with singular systems. S.L. Campbell p267
Optimal controllers for bank-to-turn CLOS guidance. D.J. Roddy, G.W. Irwin and H. Wilson p109
Parameter estimation from noncontiguous data. P.J. Gawthrop p261
Simplified analytic stability test for systems with commensurate time delays. D. Hertz, E.I. Jury and E. Zeheb p52
Singular perturbation method for Kalman filter in discrete systems. A. Kailasa Rao and D.S. Naidu p39
Square-root solution for the discrete-time Lyapunov equation. K.V. Fernando and H. Nicholson p107

DIGITAL CONTROL

Simplified technique of model order reduction with performance verification by fast digital simulation. A.S. Morris p69

FEEDBACK

Complex sectors and multivariable on-axis and off-axis circle criteria. B. Kouvaritakis and R. Husband p209
Functional bounds on the time response of multivariable nonlinear systems. J.O. Gray and D. Valsamis p92

FILTERS AND FILTERING

Monitoring a deposition process using an extended adaptive Kalman filter. P. Atkinson and M. Nixon p1

MATHEMATICAL TECHNIQUES

Infinite determinant method for stability analysis of periodic systems. S.K. Das and P.K. Rajagopalan p189
Low-order modelling via discrete stability equations. C.P. Therapos p248
Matrix sector functions and their applications to systems theory. L.S. Shieh, Y.T. Tsay and C.T. Wang p171
Numerical inversion of multidimensional Laplace transforms via block-pulse functions. C. Hwang, T.-Y. Guo and Y.-P. Shih d268
On using orthogonal functions with singular systems. S.L. Campbell p267

MATRIX ALGEBRA

Algebra-geometric approach for the model reduction of large-scale multivariable systems. L.S. Shieh and Y.T. Tsay p23
Controller synthesis of optimal sensitivity: multivariable case. B.-S. Chen p47
Pole assignment in decentralised systems: a structural approach. F.J. Evans and M. Kruser p229
Square-root solution for the discrete-time Lyapunov equation. K.V. Fernando and H. Nicholson p107

MODELLING

A new approach to reduced-order modelling. K. Warwick p74
Algebra-geometric approach for the model reduction of large-scale multivariable systems. L.S. Shieh and Y.T. Tsay p23
Low-order modelling via discrete stability equations. C.P. Therapos p248
Parameter estimation from noncontiguous data. P.J. Gawthrop p261
Parameter estimation of system dynamics with modulation-type noise—application to the modelling of the dynamic relationship between the EMG and force transients in muscle. P.J. Lago and N.B. Jones p221
Simplified technique of model order reduction with performance verification by fast digital simulation. A.S. Morris p69

MULTIVARIABLE CONTROL SYSTEMS

A simple adaptive observer for a class of multi-output systems. N. Hori, P.N. Nikiforuk and K. Kanai p142
Complex sectors and multivariable on-axis and off-axis circle criteria. B. Kouvaritakis and R. Husband p209
Controller synthesis of optimal sensitivity: multivariable case. B.-S. Chen p47
Model reduction of linear multivariable control systems via frequency matching. L.R. Pujara and K.S. Rattan p243

NONLINEAR SYSTEMS

Complex sectors and multivariable on-axis and off-axis circle criteria. B. Kouvaritakis and R. Husband p209
Functional bounds on the time response of multivariable nonlinear systems. J.O. Gray and D. Valsamis p92

OPTIMAL CONTROL

Design of optimal observers for structural control. M. Abdel-Rohman p158
Efficient algorithm for the optimal control of interconnected stochastic systems. A.K. Mahalanabis and G. Ray p99
Multipurpose controller synthesis in LQG optimal systems. B.S. Chen and W.J. Wang p182
Optimal controllers for bank-to-turn CLOS guidance. D.J. Roddy, G.W. Irwin and H. Wilson p109
Optimal variable-structure controller for DC motor speed control. Yuan-Yih Hsu and Wah-Chun Chan p233
Stochastic optimal control and its connection with estimation. R. Gessing p165
Time-optimal control algorithm for microprocessor with asymmetrical bounds. I. Serra, L. Moreno and E. Luque p238

PERTURBATION THEORY

Robust stability of diagonally dominant systems. L.F. Yeung and G.F. Bryant p253
Singular perturbation method for Kalman filter in discrete systems. A. Kailasa Rao and D.S. Naidu p39

POLES AND ZEROS

Pole assignment in decentralised systems: a structural approach. F.J. Evans and M. Kruser p229

ROBOTICS

Computer-aided design of nonlinear controllers for torque controlled robot arms. M. Sahba and D.Q. Mayne p8

SIMULATION

Simplified technique of model order reduction with performance verification by fast digital simulation. A.S. Morris p69

STABILITY

Complex sectors and multivariable on-axis and off-axis circle criteria. B. Kouvaritakis and R. Husband p209
Design of optimal observers for structural control. M. Abdel-Rohman p158
Infinite determinant method for stability analysis of periodic systems. S.K. Das and P.K. Rajagopalan p189
Robust stability of diagonally dominant systems. L.F. Yeung and G.F. Bryant p253
